

Key Takeaways

Before The Interviews:

- Resume
 - Prioritize projects you've worked on & experience from previous internships
 - List the technical skills that you have gained from projects/job experience
 - Include links to your Github and/or LinkedIn profiles
- Github
 - Upload some of the projects you've worked on to Github
 - Consistently update your repositories to show that you are an active programmer
- LinkedIn
 - This should be an expanded version of your resume
 - Create and keep connections
 - Include skills that can be endorsed by your connections
 - Follow companies that you wish to work for
- Attend career events & apply to positions early!
 - Winter Career Fair (all majors): Wednesday, January 11, 2017, 4:00-7:00pm in Locatelli
 - Engineering Career Fair: Thursday, January 12, 2017, 4:00-7:00pm in Locatelli
 - Look out for Career Center e-mails about company recruiting events!
 - Use your friends, family and professors connections to network when applying for jobs!

Behavioral Interview:

- Know your resume
- Be passionate in the position you are applying to
- Be confident of your accomplishments
- Give complete, thorough answers without going off on a tangent

Technical Interview:

- Practice, practice, practice
- Know your data structures and algorithms
- Listen carefully to your interviewer and don't be afraid to ask questions about the problem
- Clearly walk through the steps of how you will solve the problem with your interviewer
 - It's important to show your thought process, even if you are having difficulty solving the problem
 - Talk out your solution!
- If it's easier, find the brute force solution first before trying to optimize

Thank you for attending our Resume Workshop!
